RE: Catalyst for the Generation of Co-Free Hydrogen
U.S. Patent No. 6,995,115
Issued: February 7, 2006
Docket No.: 17462-5

Dear Terry:

Enclosed is the Official U. S. Letters Patent No. 6,995,115 which evidences your patent rights. Please keep this original Letters Patent in a safe place where it is not likely to become lost or stolen. You should review the patent carefully for printing errors, which we can have corrected.

Please note that you must, under the present law, pay to the Patent and Trademark Office (PTO) three maintenance fees on or before the following dates.

1st Maintenance Fee:	August 10, 2009	-	\$ 450.00
2nd Maintenance Fee:	August 8, 2013	-	\$1,150.00
3rd Maintenance Fee:	August 8, 2017	-	\$1,900.00

You should verify these amounts at the time of payment, since they can be changed by law or regulation. **Failure to timely pay these maintenance fees will result in the cancellation of your patent rights.**

Although our law firm does maintain a date calendaring system, we will not assume the responsibility of reminding you when the maintenance fees are due. **You must maintain your own calendaring system.**

Products employing the patent should be physically marked with the patent number (e.g. U.S. Patent 6,995,115 or U.S. Pat. 6,995,115). **Please be sure to read and follow the enclosed insert, Patent Marking.** Valuable rights will be lost if you fail to properly mark your invention.

Due to the fact that it is sometimes difficult, if not impossible, to locate former clients when maintenance fees become due, it is a policy of this firm to file with the PTO the enclosed papers which indicate we are withdrawing as attorney of record on this file and to further instruct the PTO to forward directly to you any notices or other correspondence relating to this patent.

Please be advised that this patent will expire September 23, 2023, twenty years from the filing date.

If you have questions, or if I may be of assistance in any other way, please do not hesitate to call.

Very truly yours,

Henry E. Naylor
